STAT

STAT [REDACTED] Furlong explained the Senator was somewhat at a loss in knowing where he could get any information on the situation and suggested a call to CIA. I told Furlong that in the interest of being helpful to the Senator we would check out the fragmentary information he had given us.

5. (Unclassified - LLM) Received a call from the office of Senator Mark O. Hatfield (R., Ore.). The caller was interested in identifying legislation designed to "control" the CIA during the last Congress. It turned out that a constituent had criticized Hatfield's vote on such legislation and his office could not identify the legislation involved. I gave a general rundown on the Agency's accountability to both the Executive and Legislative Branches, said I had no personal knowledge of any floor vote on the issue, and recommended that a check be made with the Congressional Record Indexer.

6. (Internal Use Only - LLM) Called Robert Hull, Department of State, concerning the upcoming restrictions on shipment of foreign made and purchased automobiles at Government expense. He told me the Department had failed in its first attempt with the Appropriations Committee staff to ease up somewhat on the restrictions and that there will be another attempt when State gets data from field stations on the inequities that will ensue. Mr. Hull said Donald Mansfield, in the Department, was coordinating these efforts. This information was passed on to [REDACTED]
